

# Pipeline training. Made simple.

exclusive provider of pipeline operator training and  
related consulting service to

**PipeLine  
Machinery**

**Your Global Partner for Pipeline Solutions**

Staying on top of pipeline training requirements is no easy feat. Your project is located away from large training facilities. Your equipment mix is diverse not only in types but also in makes and models, making operator training 'hit and miss'. Owning companies and regulators have specific requirements for training. These challenges were next to impossible to meet. Not anymore.

PLM has teamed with **ek pass** to be our exclusive provider of pipeline operator training and related consulting services around the globe.

**ek pass** provides training services on equipment from over one hundred manufacturers with a focus on improved operator and right-of-way safety, improved productivity and reduced maintenance costs. Operator training is usually provided on an actual spread using the equipment that the trainees will be operating - saving time and increasing the relevancy of the training.

The professional consultants with **ek pass** have been delivering award winning, customized instructor-led training on client sites worldwide.

**ek pass** develops and conducts comprehensive training programs designed to address a broad spectrum of needs in the pipeline industry - from clearing to clean up.

**Pipelayers programs:**

- Stringing
- Setup
- Bending
- Welding (Setting in and Shack Packing)
- Lowering in
- Tie ins
- Road Bore

**Excavator programs:**

- Grading
- Ditch
- Bell hole placement & configuration
- Backfill
- Cleanup

**Dozer programs:**

- Right-of-way (Clearing/Slash)
- Grading
- Backfill
- Cleanup

- Lowboy (loading/unloading)**
- All other pipeline equipment**

**ek pass** offers both computer-based (CBT) and web-based training (WBT) solutions in addition to their highly effective and successful hands-on training programs. WBT courses are geared towards corporate and individual students looking to update and refresh their skills.

All e-learning programs are developed by ek pass subject matter experts experienced in developing and delivering training programs worldwide. Supporting these content experts is a full development team of instructional designers, graphic designers, multimedia programmers, 3D animators, professional narrators and sound engineers.

Both instructor-led and e-learning training programs can be fully customized down to machine-specific data as the client requires. Client specific data (images, video, polices, procedures, etc.) can be incorporated into the training programs for a tailored training package that retains the look and feel of the organization. Training content can be updated as required to reflect changes in the company's policy and procedures, regulatory standards, etc..

WBT courses are self-guided, interactive, and can be accessed from any computer with an internet connection. Users can get immediate feedback on progress and course can be resumed safely from any location.

## Equipment Operator Training & Certificate Programs

- Customized training tailored to your equipment fleet
- Classroom fundamentals including safety, basic maintenance, operating techniques and advanced skills
- Hands-on training conducted by seasoned veterans
- Training provided on customer jobsite using equipment the operator will work on in their actual working environment

## e-learning

- computer or web-based training for corporate or individual students
- programs developed by **ek pass** subject matter experts
- supported by team of instructional designers, graphic designers, multimedia programmers, 3D animators, professional narrators and sound engineers
- customize to your company's visuals, operating procedures and job-specific regulations
- easily update content when policies/procedures change, equipment changes, regulations change

## Measured effectiveness

- Proven knowledge-testing mechanisms, including practical skills assessments while student is actually operating
- Training effectiveness measured by the degree of retained knowledge
- Certificates issued
- Real-time user tracking system stores course statistics and results
