

# TAKE PIPELINE SAFETY TO THE NEXT LEVEL

## PIPELINE SAFETY LEADERSHIP TRAINING

Caterpillar presents the first safety leadership program designed specifically for pipeliners, with scenarios straight out of pipeline job sites.

Real-life examples are explored through engaging videos, role-play exercises, interactive activities and provocative discussion topics to convey the power of culture on safety performance.

With an emphasis on inspiring personal accountability and incident prevention, the training provides leaders at all levels insight into their opportunity to influence the attitudes, beliefs and behaviors that drive performance.

A range of training options\* allow you to equip your own facilitators to deliver the material with confidence.

# PROGRAM ELEMENTS

The course was developed in partnership with 10 industry leaders to ensure the material is relatable and realistic. Each training session follows a consistent format and includes a key takeaway and call-to-action. The segmented outline allows for flexible delivery to accommodate your training needs and schedules.

**Annual Subscription Includes:** Access to streaming workshop presentation and videos, one printed Facilitator Guide, downloadable PDF of Facilitator Guide and participant handouts.
